

QuickMatch Pro™

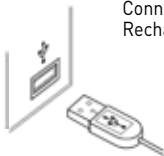

A new way to measure color.

Quick Start Guide

Components

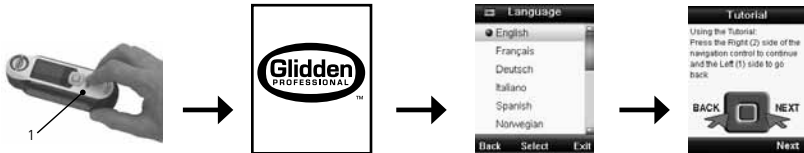

- 1 Power on/off
- 2 Measure button
- 3 Navigation control
- 4 Enter button
- 5 USB connection
- 6 Speaker and Microphone
- 7 Display
- 8 Ref. Slider

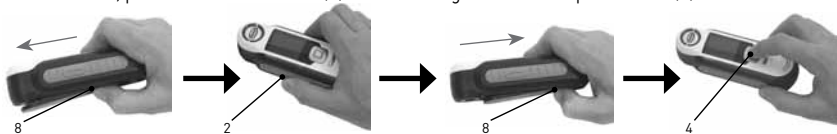

Connect **QuickMatch Pro™** to computer with USB cable. Charge batteries 4-6 hours. Recharge using computer and USB cable as needed.

Press **Power on/off** (1) to turn on instrument, select language and view tutorial.

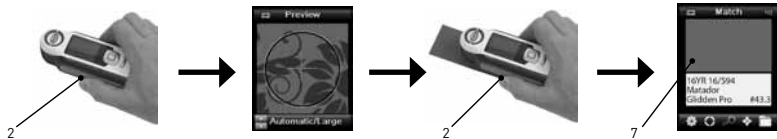

To calibrate, position reference slider (8) over optics and press **Measure** (2).

When finished, position reference slider (8) back to storage location and press **Enter** (4).

To measure, lightly press and hold **Measure** button (2) and position instrument on sample.

Press **Measure** firmly (2) to take measurement. View results on **Display** (7).

Review user options in User Manual: Settings, Color Picker, Navigation, Tags, Records

Preview

Identifies dominant shades even from patterned samples.

Measure

Tri-directional illuminated image capture accurately isolates up to 4 colors and matches to the Glidden Professional™ paint Master Palette® color system.

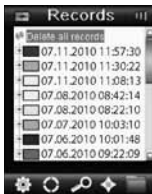

Specify

Displays color name, number, and location within the Glidden Professional™ paint Master Palette® fan deck.

Coordinate

Finds coordinating colors and recommends color schemes.

Save & Upload

Saves up to 100 colors with option of adding text and/or voice tags. Download into key architectural software programs.

Use the QuickMatch Pro™ color matching tool to integrate the Glidden Professional™ paint Master Palette® colors right into your own design and imaging software. Looking for even more? Upload digital images of your project to our exclusive Previews® Color Service and we'll provide you with expert digital visualizations of how your finished project will appear.
